# Perkins V Career Pathways Grant

## PERKINS V TIMELINE

PY2 is Perkins V implementation target for:

12.0400	46.0000	47.0604	52.0299
13.0000	46.0301	51.0000	00.0000

# Postsecondary Recognized Credentials

Industry-recognized  
certification

Educational certificate

License

Educational degree

Apprenticeship Completion  
Certificate

# Aligned to State Goals

Goal: Increase the number of working-age adults with a skill certificate or college degree from 45% today to 60% by 2030.

Goal: Expand secondary learning opportunities for all students

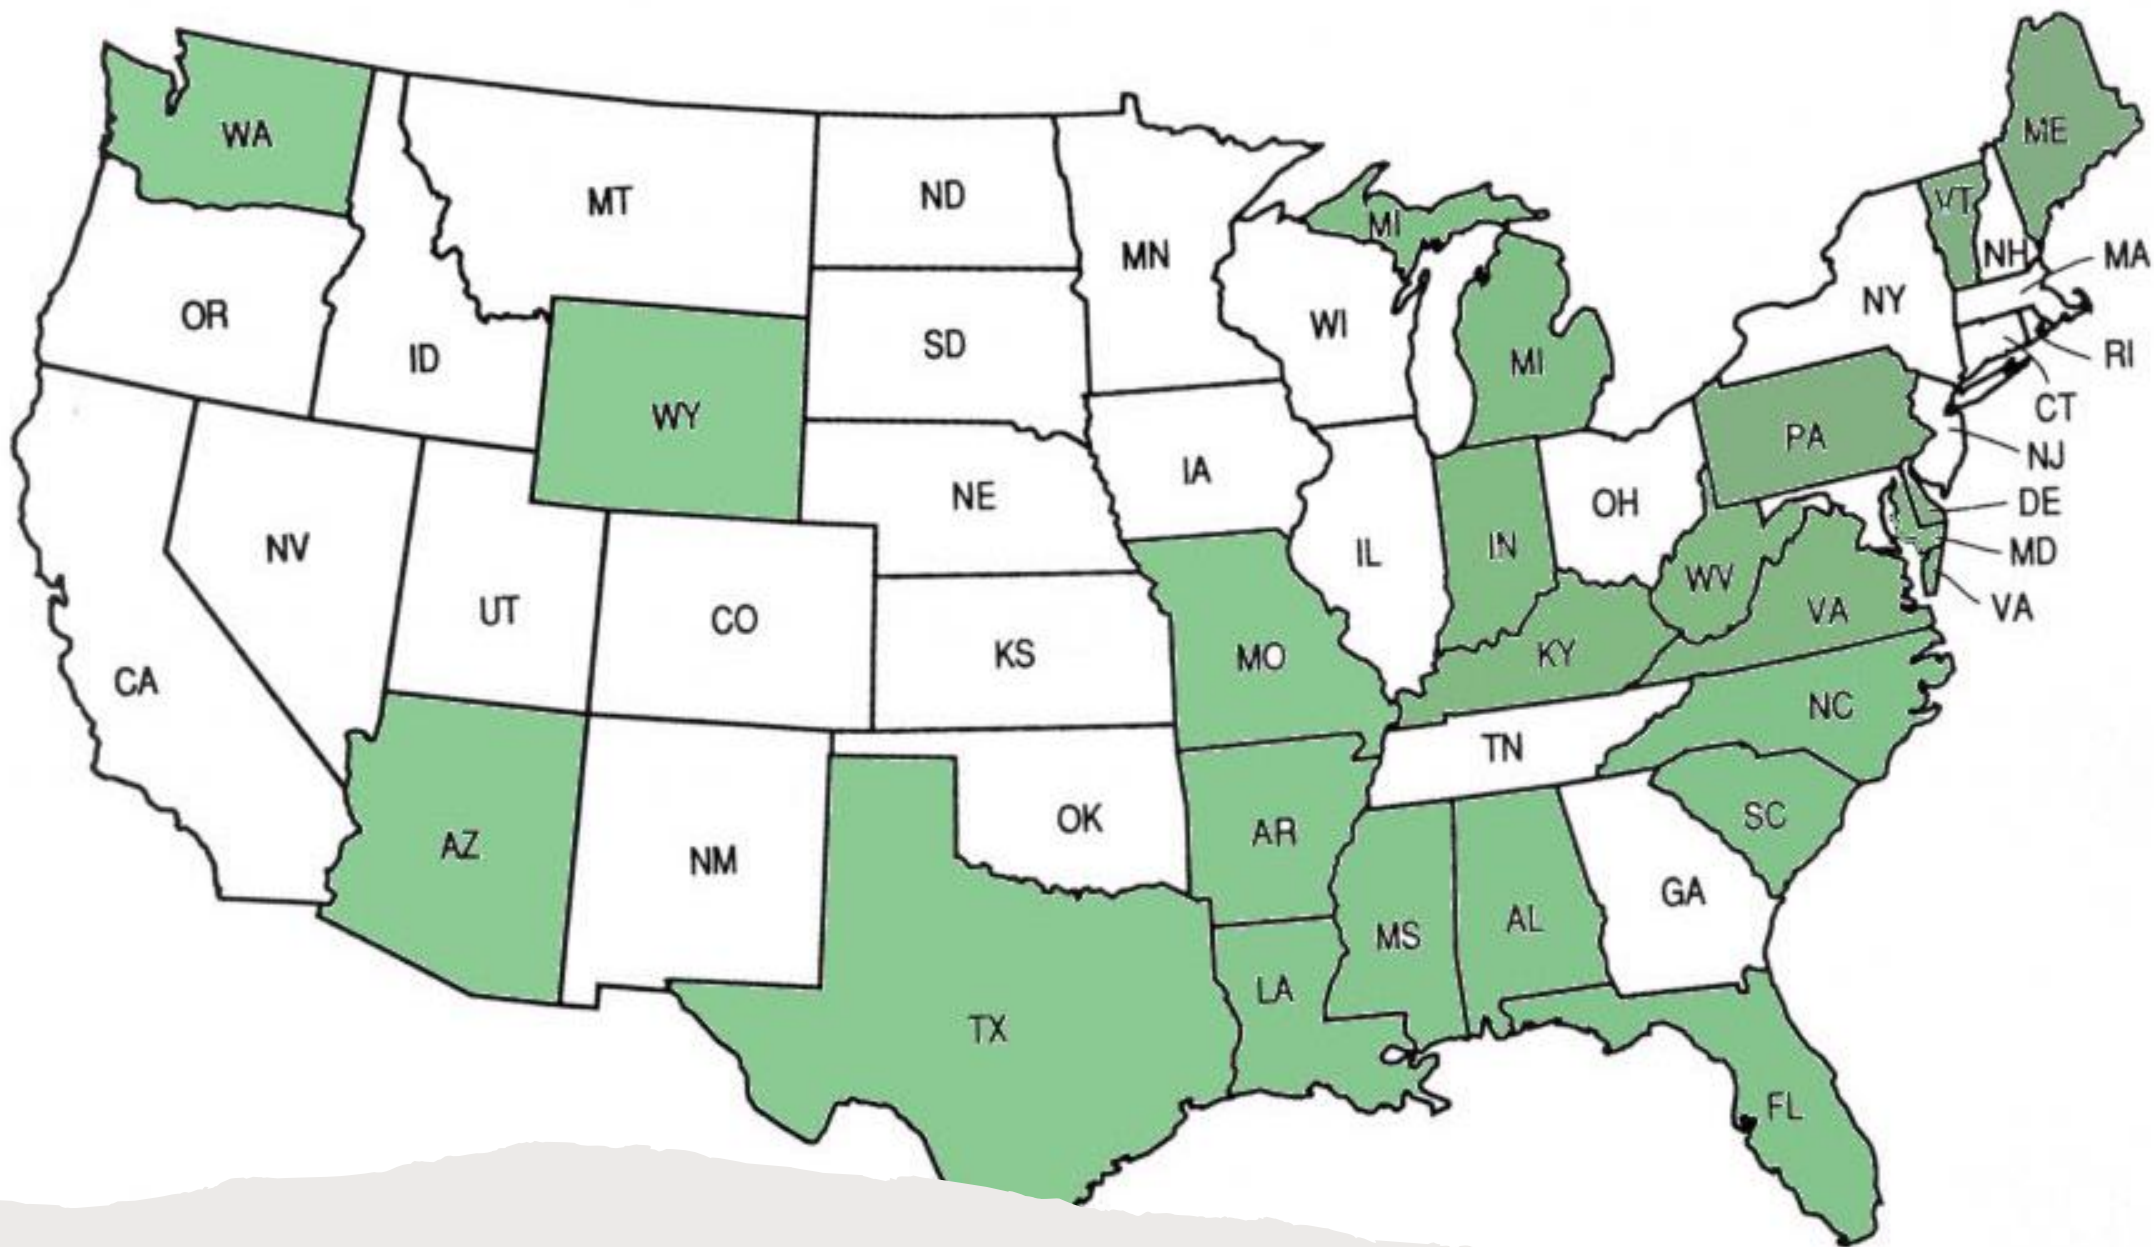

Goal: Increase the percentage of all students who graduate from high school

Goal: Increase the percentage of adults with a postsecondary credential

AK

HI

# Industry-Recognized Credential (IRC)

- ✓ Related to a particular occupation
- ✓ Recognized in labor market
- ✓ Portable across state borders
- ✓ Assess student skills

# Supplemental Credentials

# 2019 – 2020 Grant Projects

Five CIP codes approved for the current grant year:

51.0000	Health/Therapeutic Services
46.0301	Electric/Power Trans Transmitter
46.0000	Construction Trades
47.0604	Automotive Technician
52.0299	Business Administration, Management & Operation

Two CIP areas participating in parallel project work:

12.0400	Cosmetology
13.0000	Education, General

# Approval Process

# Approved Credentials

## 46.0301 Electrical & Power Transmission

- NCCER
  - Core + Electrical Level 1
  - *Additional stackable credential option: Electrical Level 2 & 3*

**Manufacturing**

My credential isn't on  
the list!

# Questions on Credentials?

A dark blue, irregular ink splatter or blotch serves as the background for the text. The splatter has a textured, watercolor-like appearance with some lighter blue and white areas around the edges. The text is centered within the dark blue area.

# Standards to Competencies

# competence [ kom-pi-tuh ns ]

*noun*

- 1 the quality of being **competent**; adequacy; possession of required skill, knowledge, qualification, or capacity:

*He hired her because of her competence as an accountant.*

Synonyms for *competence*

appropriateness

capability

capacity

competency

expertise

fitness

know-how

proficiency

qualification

savvy

skill

suitability

adequacy

makings

might

moxie

cutting it

cutting the mustard

hacking it

making the grade

qualifiedness

the goods

the right stuff

what it takes

■ MOST RELEVANT

Student	Achievement	Other Relevant Details	Averaging all Grade Entries: Result
Mariela	"C" achievement throughout course		Final Grade = C
Christian	"A" achievement throughout course	Chronic late homework & some 0s 	Final Grade = C
Tatiana	"A" on tests, but...	Struggles to learn until then (homework) 	Final Grade = C
Sayed	"F" achievement early	"A" achievement by the end 	Final Grade = C
Oscar	Ds and Fs on tests, but ...	Hard worker, great kid, homework on time, extra credit 	Final Grade = C

# Credentials vs. Competencies

A credential is the validation of a **set** of competencies.

# Standards to Competencies: Career Ready Practices

Technical

Cluster

Pathway

Career Ready  
Practices

**CCTC**  
Common Career Technical Core

## The Career Ready Practices

### **ACT AS A RESPONSIBLE AND CONTRIBUTING CITIZEN AND EMPLOYEE.**

Career-ready individuals understand the obligations and responsibilities of being a member of a community, and they demonstrate this understanding every day through their interactions with others. They are conscientious of the impacts of their decisions on others and the environment around them. They think about the near-term and long-term consequences of their actions and seek to act in ways that contribute to the betterment of their teams, families, community and workplace. They are reliable and consistent in going beyond the minimum expectation and in participating in activities that serve the greater good.

### **APPLY APPROPRIATE ACADEMIC AND TECHNICAL SKILLS.**

Career-ready individuals readily access and use the knowledge and skills acquired through experience and education to be more productive. They make connections between abstract concepts with real-world applications, and they make correct insights about when it is appropriate to apply the use of an academic skill in a workplace situation.

Essential, enduring and transferable skills and knowledge  
necessary for CNA credential

Communication of Progress

Assessment Practices

Stackable Credentials &  
Certifications

Big Ideas

Employ safe work practices  
and follow health and safety  
policies and procedures to  
prevent injury and illness.

CPR Certification  
First Aid Certification  
AED Certification

Formative and  
Summative Feedback

Performance Indicators

Demonstrate and apply the use of PPE.  
Demonstrate standard precautions.  
Demonstrate principles of body mechanics during patient care.  
Demonstrate personal safety procedures based on OSHA and CDC regulations.

Handwashing, use of PPE, demonstration  
ergonomics, patient transfer

Formative Feedback

Content Standards

Describe characteristics of microorganisms.  
Explain principles of infection transmission.  
Differentiate methods of controlling the spread and growth of pathogens.  
Identify existing and potential hazards to clients, co-workers and self.

Recognize the chain of infection.  
Explain infection control practices and procedures.

Completion of Biology and  
chemistry, spread of  
infection/infection control, etc.

# Performance Indicators

Implement personal and jobsite safety rules and regulations to maintain safe and healthy working conditions and environments.

OSHA

- ✓ Identify workplace or jobsite environmental hazards
- ✓ Implement safety precautions

NCCER  
Core

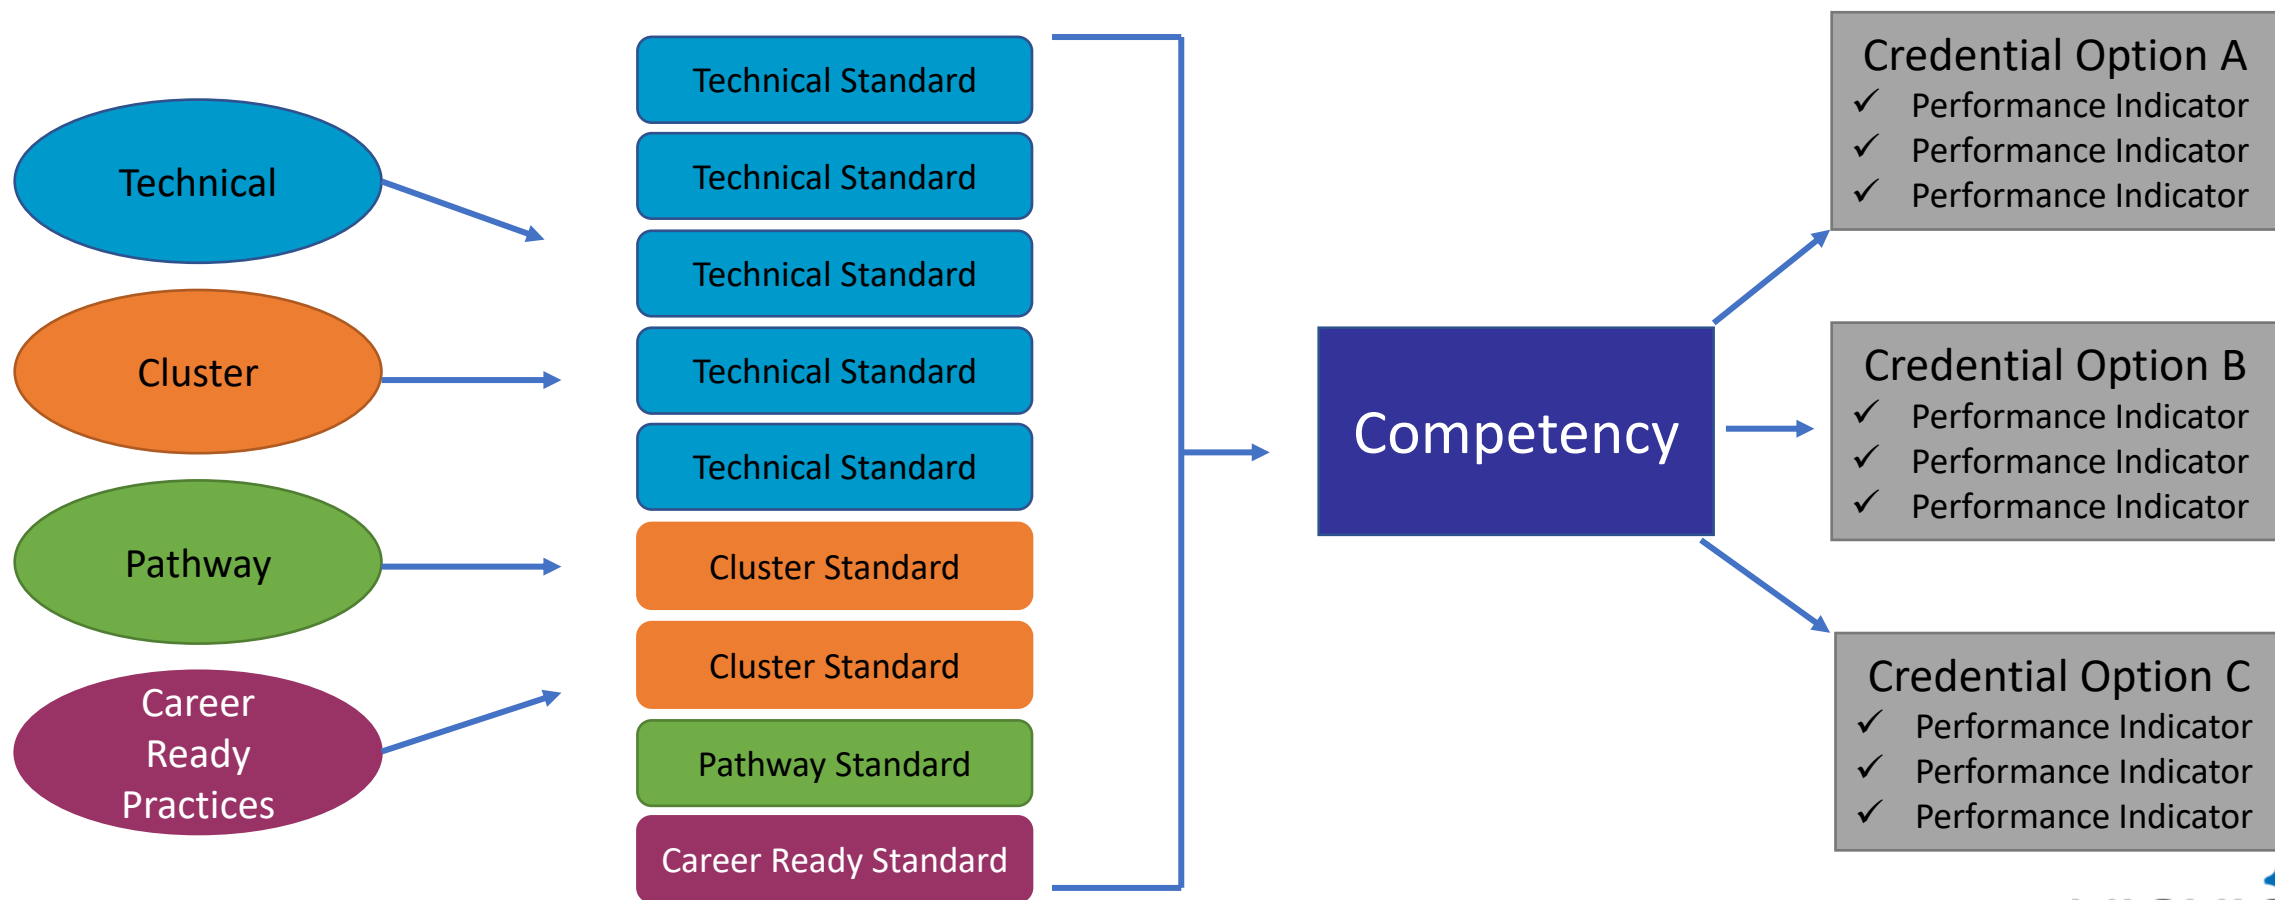

- ✓ Assess workplace conditions with regard to safety
- ✓ Use knowledge of CPR and PPE

NCCER  
Level 1

- ✓ Use safety equipment
- ✓ Identify and employ safety rules and laws

# Standards to Competencies to Credentials

Safety, Health & Environment	Academic Foundations	Tools and Equipment	Communication Skills
Implement personal and jobsite safety rules and regulations to maintain safe and healthy working conditions and environments.	Demonstrate Language Arts, Mathematics and Science knowledge and skills required for educational and career opportunities.	Identify and demonstrate use of hand, power and electrical related machinery.	Develop a variety of communication skills necessary for employment.
<i>Identify, describe, demonstrate knowledge of basic concepts of advanced electrical theory.</i>			
Problem-Solving and Critical Thinking	Leadership & Teamwork	Information Technology	Business Systems, Legal and Ethics
Describe and demonstrate a variety of problem-solving and critical thinking strategies as necessary techniques for successful employment.	Describe and demonstrate leadership and teamwork skills necessary for employment.	Understand and use necessary technology related skill sets associated with career development and the field of electrical trades.	Identify, describe and demonstrate the necessary elements in business and project management as aligned to the field of electrical trades.
	<i>Develop a broad range of career and employability skills necessary for career beyond high school career practices.</i>		
Career and Employability	Project Management	Technical Skills	
<i>Develop a broad range of career and employability skills necessary for career beyond high school career practices.</i>	Identify and describe a variety of building and project management methods needed to complete a project.	<i>Identify, describe, demonstrate knowledge of basic concepts of electrical theory.</i>	Identify and demonstrate appropriate conduit bending practices.
		Identify, describe and use the National Electrical Code and Michigan Code as needed per industry.	Describe and demonstrate pull and junction boxes practices and applications.
		Identify and demonstrate concepts relating to residential and commercial wiring.	Identify, describe and demonstrate appropriate conductor installations, termination and slices.
		Identify and demonstrate appropriate residential conductors, boxes and fittings.	Describe and demonstrate grounding procedures.
		Identify and demonstrate methods of overcurrent protection.	Identify, describe and demonstrate knowledge of a variety of lighting systems.
		Identify, describe and demonstrate installation of conductors.	Identify and define necessary components of low voltage and alarm systems.
		Identify, describe and demonstrate use and theory of motors as applicable.	Identify, describe and demonstrate knowledge of transformer systems.
		Identify and describe components and theories associated with alternating current.	Identify, describe and demonstrate basic knowledge of voice, data and video systems.

# Questions on Standards to Competencies ?

# Electrical & Power Transmission Installation PCCs

# Perkins Course Competencies (PCCs)

A specified group of competencies aligned with the state CTE program standards that take approximately 80 hours of instruction to deliver. The competencies are grouped as part of the career pathways grant process.

Competencies will be marked complete for a student when the student earns a grade of 2.0 or better in a local course section that covers those competencies.

PCC	Competencies (*any Standard/Competency not covered in a Credential must be covered by/with teacher developed unit(s) of study)	Current Segments
A	Implement personal and jobsite safety rules and regulations to maintain safe and healthy working conditions and environments.	(1) Safety, Tools, Electrical Theory; (2) Federal, State, and Local Code Regulations
	Identify and demonstrate use of hand, power and electrical related machinery.	(1) Safety, Tools, Electrical Theory; (2) Federal, State, and Local Code Regulations, (4) Utilizing Testing/Electrical Test Equipment
	Develop a variety of communication skills necessary for employment.	(9) Blueprint and Project Management
	Identify, describe, demonstrate knowledge of basic concepts of electrical theory.	(1) Safety, Tools, Electrical Theory; (2) Federal, State, and Local Code Regulations, (3) Utilizing Residential Conductors, Cables & Boxes, (4) Utilizing Testing/Electrical Test Equipment
	Identify, describe, demonstrate knowledge of basic concepts of advanced electrical theory.	(2) Explain Federal, State, and Local Code Regulations, (4) Utilizing Testing/Electrical Test Equipment
	Identify, describe and use the National Electrical Code and Michigan Code as needed per industry.	(1) Explain Federal, State, and Local Code Regulations, (2) Federal, State, and Local Code Regulations, (4) Utilizing Testing/Electrical Test Equipment
	Identify and demonstrate concepts relating to residential and commercial wiring.	(1) Safety, Tools, Electrical Theory, (5) Utilizing Residential Conductors, Cables & Boxes
B	Identify, describe and demonstrate use and theory of motors as applicable.	(1) Safety, Tools, Electrical Theory, (12) Motors, Motor Controls
	Identify and describe components and theories associated with alternating current.	(1) Safety, Tools, Electrical Theory
	Identify and demonstrate appropriate conduit bending practices.	(1) Safety, Tools, Electrical Theory, (2) Utilizing Residential Conductors, Cables & Boxes
	Describe and demonstrate pull and junction boxes practices and applications.	(1) Safety, Tools, Electrical Theory, (3) Utilizing Residential Conductors, Cables & Boxes
	Identify, describe and demonstrate appropriate conductor installations, termination and splices.	(1) Explain Federal, State, and Local Code Regulations, (3) Utilizing Residential Conductors, Cables & Boxes, (5) Utilizing Industrial & Commercial Conductors, Raceway Boxes, & Fittings
	Understand and use necessary technology related skill sets associated with career development and the field of electrical trades.	(2) Explain Federal, State, and Local Code Regulations, (9) Blueprint and Project Management
	Identify, describe and demonstrate knowledge of a variety of lighting systems.	(1) Safety, Tools, Electrical Theory, (6) Install and Maintain Lighting & Luminaires
C	Identify and define necessary components of low voltage and alarm systems.	(1) Safety, Tools, Electrical Theory, (11) Voice/Data, T.V. Signaling Systems
	Identify, describe and demonstrate knowledge of transformer systems.	(1) Safety, Tools, Electrical Theory, (10) Transformers
	Identify, describe and demonstrate basic knowledge of voice, data and video systems.	(1) Safety, Tools, Electrical Theory, (11) Voice/Data, T.V. Signaling Systems
	Identify, describe and demonstrate the necessary elements in business and project management as aligned to the field of electrical trades.	(2) Explain Federal, State, and Local Code Regulations, (9) Blueprint and Project Management
	Develop a broad range of career and employability skills necessary for career beyond high school career practices.	(1) Safety, Tools, Electrical Theory, (9) Blueprint & Project Management
	Identify and describe a variety of building and project management methods needed to complete a project.	(1) Safety, Tools, Electrical Theory, (2) Explain Federal, State, and Local Code Regulations, (9) Blueprint and Project Management
D	Participate in appropriate work-based learning opportunities associated with the field.	

Competency Codes	PCC	Competencies (*any Standard/Competency not covered in a Credential must be covered by/with teacher developed unit(s) of study)	OSHA 10/Red Cross First Aid	NCCER Core	NCCER Electrical 1	MC3 (Supplemental)	US DOL Apprenticeship Certificate	Current Segments
